## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a-z, A-Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @#\$ Hi

Output: Hello Hi

### **Answer**

```
import java.util.*;
class Main {
    public static void main(String args[]){
        Scanner sc=new Scanner(System.in);
        String S=sc.nextLine();
        String[] words=S.split(" ");
        String result="";
        int validCount=0;
        for(int i=0;i<words.length;i++){
            String word=words[i];
            if(word.length()>=2 && word.matches("[a-zA-Z]+")){
                result+=word+" ";
                validCount++;
            }
        }
        if (validCount==0){
            System.out.println("No valid words.");
        }else{
            System.out.println(result.trim());
        }
    }
}
```

**Status :** Correct

**Marks :** 10/10
